

Designation: D2634 – 07 (Reapproved 2021)

Standard Specification for Methyl Amyl Acetate (95 % Grade)¹

This standard is issued under the fixed designation D2634; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers methyl amyl acetate² (95 % grade) for use in paint, varnish, and related products.

1.2 The values stated in SI units are to be regarded as standard. No other units of measurement are included in this standard.

1.3 For specific hazard information and guidance, see the supplier's Material Safety Data Sheet for materials listed in this specification.

1.4 The following applies to all specified limits in this standard; for purposes of determining conformance with this standard, an observed value or a calculated value shall be rounded off "to the nearest unit" in the last right-hand digit used in expressing the specification limit, in accordance with the rounding-off method of Practice E29.

1.5 *This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.*

2. Referenced Documents

2.1 ASTM Standards:³

D268 Guide for Sampling and Testing Volatile Solvents and Chemical Intermediates for Use in Paint and Related Coatings and Material (Withdrawn 2021)⁴

D1078 Test Method for Distillation Range of Volatile Organic Liquids

D1209 Test Method for Color of Clear Liquids (Platinum-Cobalt Scale)

¹ This specification is under the jurisdiction of ASTM Committee D01 on Paint and Related Coatings, Materials, and Applications and is the direct responsibility of Subcommittee D01.35 on Solvents, Plasticizers, and Chemical Intermediates.

Current edition approved July 1, 2021. Published August 2021. Originally approved in 1967. Last previous edition approved in 2013 as D2634 – 07 (2013). DOI: 10.1520/D2634-07R21.

² This compound is also known as 4-methyl-2-pentyl acetate.

E300 Practice for Sampling Industrial Chemicals

2.2 U.S. Federal Specification:⁵

PPP-C-2020 Packaging of Chemicals, Liquid, Dry, and Paste

3. Properties

3.1 Methyl amyl acetate shall conform to the following requirements:

Apparent specific gravity:	
20/20 °C	0.856 to 0.859 or
25/25 °C	0.852 to 0.855
Color, Pt-Co units, max (Note 2)	15
Distillation range	
Below 142.5 °C	none
Above 149.5 °C	none
Nonvolatile matter mg/100 mL, max	5
Water, wt %, max (see Note 1)	0.1
Acidity (free acid as acetic acid), wt %, max	0.01
Ester value, wt %, min	95.0

NOTE 1—In some cases, Test Method D1476 may serve as a useful alternative method to determine the presence of water. Because it is a qualitative test, its use would require agreement between user and supplier.
