

Designation: D7468 – 22

# Standard Test Method for Cummins ISM Test<sup>1</sup>

This standard is issued under the fixed designation D7468; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

## 1. Scope\*

1.1 The test method covers a heavy-duty diesel engine test procedure conducted under high soot conditions to evaluate oil performance with regard to valve train wear, top ring wear, sludge deposits, and oil filter plugging in an EGR environment. This test method is commonly referred to as the Cummins ISM Test.<sup>2</sup>

1.2 The values stated in SI units are to be regarded as standard. No other units of measurement are included in this standard.

1.2.1 *Exception*—The only exception is where there is no direct SI equivalent such as screw threads, national pipe threads/diameters, tubing sizes, or where there is a sole source of supply equipment specification.

1.3 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety, health, and environmental practices and determine the applicability of regulatory limitations prior to use.* See **Annex A1** for general safety precautions.

### 1.4 Table of Contents:

|                                                     | Section |
|-----------------------------------------------------|---------|
| Scope                                               | 1       |
| Referenced Documents                                | 2       |
| Terminology                                         | 3       |
| Summary of Test Method                              | 4       |
| Significance and Use                                | 5       |
| Apparatus                                           | 6       |
| Test Engine Configuration                           | 6.1     |
| Test Engine                                         | 6.1.1   |
| Oil Heat Exchanger, Adapter Blocks, Block Off Plate | 6.1.2   |
| Oil Filter Head Modification                        | 6.1.3   |
| Oil Pan Modification                                | 6.1.4   |
| Engine Control Module (ECM)                         | 6.1.5   |
| Engine Position Sensor                              | 6.1.6   |

<sup>1</sup> This test method is under the jurisdiction of ASTM Committee D02 on Petroleum Products, Liquid Fuels, and Lubricants and is the direct responsibility of Subcommittee D02.B0 on Automotive Lubricants.

Current edition approved July 1, 2022. Published July 2022. Originally approved in 2008. Last previous edition approved in 2021 as D7468 – 21. DOI: 10.1520/D7468-22.

<sup>2</sup> Until the next revision of this test method, the ASTM Test Monitoring Center will update changes in this test method by means of Information Letters. Information letters may be obtained from the ASTM Test Monitoring Center, 203 Armstrong Drive, Freeport, PA 16229, Attention: Director. This edition incorporates revisions in all information letters through No. 22-1.

|                                                      | Section |
|------------------------------------------------------|---------|

| Test Report                                                        | 12        |                                        |             |
| Report Forms                                                       | 12.1      |                                        |             |
| Reference Oil Test                                                 | 12.2      |                                        |             |
| Electronic transmission of Test Results                            | 12.2.1    |                                        |             |
| Precision and Bias                                                 | 13        |                                        |             |
| Precision                                                          | 13.1      |                                        |             |
| Intermediate Precision Conditions                                  | 13.1.1    |                                        |             |
| Reproducibility Conditions                                         | 13.1.2    |                                        |             |
| Bias                                                               | 13.2      |                                        |             |
| Keywords                                                           | 14        |                                        |             |
| Annexes                                                            |           |                                        |             |
| Safety Precautions                                                 | Annex A1  |                                        |             |
| Intake Air Aftercooler                                             | Annex A2  |                                        |             |
| Engine Build Parts Kit                                             | Annex A3  |                                        |             |
| Sensor Locations, Special Hardware, and Engine Block Modifications | Annex A4  |                                        |             |
| External Oil System                                                | Annex A5  |                                        |             |
| Cummins Service Publications                                       | Annex A6  |                                        |             |
| Specified Units and Formats                                        | Annex A7  |                                        |             |
| Report Forms and Data Dictionary                                   | Annex A8  |                                        |             |
| Sludge Rating Worksheets                                           | Annex A9  |                                        |             |
| Oil Analyses                                                       | Annex A10 |                                        |             |

1.5 *This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.*

## 2. Referenced Documents

### 2.1 ASTM Standards:<sup>3</sup>

- D86 Test Method for Distillation of Petroleum Products and Liquid Fuels at Atmospheric Pressure
- D93 Test Methods for Flash Point by Pensky-Martens Closed Cup Tester
- D97 Test Method for Pour Point of Petroleum Products
- D130 Test Method for Corrosiveness to Copper from Petroleum Products by Copper Strip Test
- D235 Specification for Mineral Spirits (Petroleum Spirits) (Hydrocarbon Dry Cleaning Solvent)
- D287 Test Method for API Gravity of Crude Petroleum and Petroleum Products (Hydrometer Method)
- D445 Test Method for Kinematic Viscosity of Transparent and Opaque Liquids (and Calculation of Dynamic Viscosity)
- D482 Test Method for Ash from Petroleum Products
- D524 Test Method for Ramsbottom Carbon Residue of Petroleum Products
- D613 Test Method for Cetane Number of Diesel Fuel Oil
- D664 Test Method for Acid Number of Petroleum Products by Potentiometric Titration
- D976 Test Method for Calculated Cetane Index of Distillate Fuels
- D1319 Test Method for Hydrocarbon Types in Liquid Petroleum Products by Fluorescent Indicator Adsorption
- D2274 Test Method for Oxidation Stability of Distillate Fuel Oil (Accelerated Method)
- D2500 Test Method for Cloud Point of Petroleum Products and Liquid Fuels
- D2622 Test Method for Sulfur in Petroleum Products by Wavelength Dispersive X-ray Fluorescence Spectrometry
- D2709 Test Method for Water and Sediment in Middle Distillate Fuels by Centrifuge
- D4052 Test Method for Density, Relative Density, and API Gravity of Liquids by Digital Density Meter
- D4175 Terminology Relating to Petroleum Products, Liquid Fuels, and Lubricants
- D4294 Test Method for Sulfur in Petroleum and Petroleum Products by Energy Dispersive X-ray Fluorescence Spectrometry
