

Designation: F2461 – 23

Standard Practice for Manufacture, Construction, Operation, and Maintenance of Aquatic Play Equipment¹

This standard is issued under the fixed designation F2461; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This practice covers information for manufacture, construction, operations and maintenance of aquatic play equipment and provides safety performance standards for various types of public aquatic play components and aquatic play composite structures.

1.2 Inclusions:

1.2.1 Climbable and climb-resistant aquatic play components, composite aquatic play structures, user controls, water sprays, fountains, and slides that occur on wet decks and wading, swimming or leisure pools. The play components specified herein occur for use in aquatic play areas.

1.2.2 Play equipment, fall zones, use zones for wet decks, wading pools, swimming pools and leisure pools.

1.2.3 This standard is intended to apply to Aquatic Play Equipment that is located in and around re-circulated and potable water recreational facilities. Such facilities include but are not limited to amusement parks, theme parks, water parks, family entertainment centers, municipal swimming pools and municipal parks.

1.2.4 Waterslides 6 ft in height or smaller.

1.3 Exclusions:

1.3.1 Playground equipment that does not have an entry or an exit onto or into a wet deck, wading pool, swimming pool or aquatic recreation pool.

1.3.2 Home playground or home pool equipment or play equipment as scoped in Consumer Safety Performance Specification F1148-21 and ANSI/NSPI-5.

1.3.3 Waterslides as scoped in Practice F2376-22.

1.3.4 Flotation devices used on water slides or in swimming pools.

1.3.5 Swimming pools as specified by ANSI/NSPI-1 or ANSI/IAF-9.

1.3.6 Products or facility elements specifically designed to provide access to and from pools for people with disabilities.

1.3.7 Water rides such as log flumes, raft rides, inner tube rides, waterslides or other attractions where the participant sits in a vehicle or is physically propelled or moved by or with water.

1.3.8 Sports equipment, fitness equipment, and diving equipment.

1.4 Compliance:

1.4.1 Where water is indirectly or directly added or applied to Consumer Safety Performance Specification F1487-21 play equipment, the equipment shall comply with this standard. Where a requirement for compliance to a section of the Consumer Safety Performance Specification F1487-21 standard is required by this standard, the section number is preceded with the standard's designation.

1.4.2 Soft contained play structures with aquatic play components shall comply with Safety Performance Specification F1918-21 except as modified by this standard.

1.4.3 Aquatic play components and composite play structures represented, as complying with this safety performance standard shall meet all applicable requirements specified herein. Anyone representing compliance with this standard shall keep such essential records as are necessary to document any claim that the requirements within this standard have been met.

1.5 This standard includes the following sections:

Scope	Section 1
Referenced Documents	Section 2
Terminology	Section 3
Manufacturing and Materials	Section 4
Design	Section 5
Performance Requirements	Section 6
Operator Responsibilities	Section 7
Manufacturer/Designer Responsibilities	Section 8
Installer Responsibilities	Section 9

1.6 The values stated in inch-pound units are to be regarded as standard. The values given in parentheses are mathematical conversions to SI units that are provided for information only and are not considered standard. (The conversion factor from inch-pound to metric units is 1 in. = 25.4 mm, and 1 lb = 4.4482 N.)

1.7 This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the

¹ This practice is under the jurisdiction of ASTM Committee F24 on Amusement Rides and Devices and is the direct responsibility of Subcommittee F24.70 on Water Related Amusement Rides and Devices.

Current edition approved June 15, 2023. Published August 2023. Originally approved in 2009. Last previous edition approved in 2020 as F2461 – 20a. DOI: 10.1520/F2461-23.

responsibility of the user of this standard to establish appropriate safety, health, and environmental practices and determine the applicability of regulatory limitations prior to use.

1.8 This international standard was developed in accordance with internationally recognized principles on standardization established in the *Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee*.

4.2 *Durability*—Aquatic play components and composite play systems shall be manufactured and constructed only of materials that have a demonstrated durability in the aquatic playground, swimming pool or similar setting.

4.2.1 Any new materials shall have documented performance and material properties or tested accordingly for durability by the equipment manufacturer.

4.3 *Compatibility*—Materials used in the manufacture of aquatic play components shall not create an unsanitary or toxic condition for users and the aquatic environment in which they are installed.

4.4 Materials:

4.4.1 *Metals*—Refer to Consumer Safety Performance Specification **F1487-21**, Sections 4.1.1 and 4.1.2.

4.4.2 *Plastics*—Refer to Consumer Safety Performance Specification **F1487-21**, Section 4.1.1.

4.4.3 *Wood*—Refer to Consumer Safety Performance Specification **F1487-21**, Sections 4.1.1 and 4.1.3.

4.4.4 *Concrete*—Concrete footings and slabs shall comply with local jurisdiction or equal to the requirements of the International Building Code.

4.4.5 *Foam*—Foam materials used in aquatic play components shall be skinned or of a closed cell type. Foam materials that are subject to ultraviolet (UV) degradation shall be protected against ultraviolet light or include ultraviolet degradation inhibitors. Foam products shall not leach any chemicals that could affect water chemistry.

4.4.6 Automotive or industrial tires are not permitted in the aquatic play environment.

4.5 Components:

4.5.1 *Netting*—Netting material for structural purpose, subject to UV degradation, shall be protected from U/V exposure or include U/V degradation inhibitors.

4.5.2 *Fasteners and Cables*—Fasteners are required to comply with Practice **F2291-22a**, Section 16 and also Consumer Safety Performance Specification **F1487-21** Section 4.2.1 to Section 4.2.4 inclusive.

4.5.2.1 Fasteners in aquatic play components when located on walking, stepping, sitting and sliding surfaces of aquatic play components and wet decks shall be flush, and without any sharp or abrasive finish.

4.5.2.2 All fasteners used to construct Aquatic Play Equipment shall be maintained and consistent as specified by the manufacturer.

4.5.2.3 All fasteners, connecting, and covering devices shall be corrosion resistant or be provided with a corrosion-resistant coating.

4.5.2.4 When installed in accordance with the manufacturer's specifications, fasteners, connecting, and covering devices shall not loosen or be removable without the use of tools.

4.5.2.5 Hardware in moving joints shall also be secured against unintentional loosening.

4.5.2.6 Moving suspended elements shall be connected to the fixed support with bearings or bearing surfaces that serve to reduce friction or wear.

4.5.2.7 Steel cable that is permanently affixed to a hanger assembly performs as a bearing surface. Cable ends shall be
