

Designation: F2462 – 05 (Reapproved 2026)

Standard Practice for Operation and Maintenance of Sewers with Optical Fiber Systems¹

This standard is issued under the fixed designation F2462; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This practice applies to the operation and maintenance of sewers with a subsequent installation of optical fiber cable in accordance with Practice F2303.

1.2 This practice applies to gravity flow storm sewers, sanitary sewers, and combined sewers.

1.3 This practice does not apply to force mains, siphons, or other pressurized sewers.

1.4 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety, health, and environmental practices and determine the applicability of regulatory limitations prior to use.*

1.5 *This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.*

2. Referenced Documents

2.1 *ASTM Standards:*²

F2303 Practice for Selection of Gravity Sewers Suitable for Installation of Optical Fiber Cable and Conduits

2.2 *ANSI Standard:*³

ANSI Z117.1-2003 Safety Requirements for Confined Spaces

¹ This practice is under the jurisdiction of ASTM Committee F36 on Technology and Underground Utilities and is the direct responsibility of Subcommittee F36.10 on Optical Fiber Systems within Existing Infrastructure.

Current edition approved June 1, 2026. Published June 2026. Originally approved in 2005. Last previous edition approved in 2021 as F2462 – 05 (2021). DOI: 10.1520/F2462-05R26.

2.3 *IEC Standards:*⁴

IEC 60825-1 Ed. 1.2, en 2001, Safety of Laser Products—Part 1: Equipment Classification, Requirements and User's Guide

IEC 60050-731 Electrotechnical Vocabulary: Optical Fiber Communications

2.4 *Federal Standard:*⁵

OSHA Regulation 29 CFR Part 1910.146, Permit-Required Confined Spaces

3. Terminology

3.1 *Definitions:*

3.1.1 *conduit, n*—tubing used to house optical fiber cable that is connected to, but separate from, a sewer pipeline.

3.1.2 *O&M, n*—operation and maintenance.

3.1.3 *optical fiber cable, n*—cable formed of one or more strands of optical fiber for transmission of data, video, audio, voice, or other information.

3.1.4 *optical fiber cable owner, n*—entity holding legal rights to, and responsible for the operation and maintenance of, the optical fiber cable. The optical fiber cable owner is also responsible for operation and maintenance of any components associated with the optical fiber system that are not part of the sewer pipeline as defined in this standard.

3.1.5 *optical fiber system, n*—group of components that comprise the elements necessary to enable optical fiber cable to be installed, maintained, and operated inside a sewer pipeline.

3.1.6 *sewers, n*—pipelines for the conveyance of wastewater or stormwater, or both.

3.1.7 *vault, n*—manhole, hand hole, or other buried enclosure used to store slack-loops of cable, fiber cable splices, or provide access to the sewer for maintenance and inspection, or
