

Standard Specification for Treestands, Climbing Sticks, and Tripod or Tower Stands¹

This standard is issued under the fixed designation F3249; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers requirements for treestands, climbing sticks, and tripod/tower stands that are used for hunting, photographing, or general observation. Furthermore, this specification establishes minimum warning and package labeling, instructional content, safety device requirements, and physical testing parameters. This is a performance based specification and is not intended to restrict design.

1.2 Partial utilization of this specification is prohibited. Any statement of compliance with this specification shall be a certification that the product tested meets all of the requirements of the specification in its entirety. A product that fails to meet any one of the requirements of this specification is considered to have failed this specification and shall not be sold with any indication that it meets parts of the specification.

1.3 The values stated in inch-pound units are to be regarded as standard. No other units of measurement are included in this standard.

1.4 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety, health, and environmental practices and determine the applicability of regulatory limitations prior to use.*

1.5 *This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.*

2. Referenced Documents

2.1 *ASTM Standards:*²

F2123 Practice for Treestand Instructions

F2128 Test Method for Treestand Repetitive Loading Capability

F2275 Practice for Treestand Manufacturer Quality Assurance Program

F2337 Test Method for Treestand Fall Arrest System

F3545 Test Method for Static Loading of Treestands, Climbing Sticks, and Tripod or Tower Stands

3. Terminology

3.1 *Definitions:*

3.1.1 *backbar, n*—adjustable component of a climbing treestand that engages the tree to provide support. The backbar may be rigid or flexible.

3.1.2 *climbing belt, n*—a strap/belt or similar device which is fastened about the person in a manner so as to contain the torso and stabilize the user's horizontal load while either working from a vertical position to attach treestands, climbing devices, and so forth, or during ascent/descent of tree or ladder. A FBH may be constructed to additionally serve this function.

3.1.3 *corner stability, n*—the ability of a treestand to resist eccentricity, twisting, or sudden movement when load is applied separately to each of the four corners of a foot platform.

3.1.4 *fall arrest system, n*—system that is assembled for the purpose of arresting an accidental fall of its user. A FAS consists of a full body harness, lanyard, anchorage means, connecting hardware, climbing belt (for fixed position stands), and suspension relief device.

3.1.5 *foot platform, n*—horizontal structural area of a treestand on which the user stands and/or places his feet.

3.1.6 *full body harness (FBH), n*—component with a design of straps that is fastened about the person in a manner so as to contain the torso and distribute the fall arrest forces over at least the upper thighs, pelvis, chest, and shoulders, with means for attaching it to other components or subsystems.

3.1.7 *integral seat, n*—a seat which is attached to the footplatform and is necessary to the completeness of the product.

3.1.8 *multiple user rated capacity (MUR), n*—the maximum load capacity, not to be exceeded, of a treestand, tripod or tower stand as determined by the manufacturer for simultaneous multiple users.

¹ This specification is under the jurisdiction of ASTM Committee F08 on Sports Equipment, Playing Surfaces, and Facilities and is the direct responsibility of Subcommittee F08.18 on Treestands.

Current edition approved Feb. 1, 2024. Published February 2024. Originally approved in 2017. Last previous edition approved in 2020 as F3249 – 20. DOI: 10.1520/F3249-24.
