

**SPECIFICATION FOR
GALVANIZED
MILD STEEL WIRE FOR
ARMOURING CABLES**

Confirmed

SEP 1986

BS 1442 : 1969

Incorporating Amendment issued February 1971 (AMD 700)

THIS BRITISH STANDARD, having been approved by the Iron and Steel Industry Standards Committee, was published under the authority of the Executive Board on 11 December, 1969.

First published June, 1948
First revision October, 1960
Second revision December, 1969

SBN: 580 05564 7

The Institution desires to call attention to the fact that this British Standard does not purport to include all the necessary provisions of a contract.

In order to keep abreast of progress in the industries concerned, British Standards are subject to periodical review. Suggestions for improvements will be recorded and in due course brought to the notice of the committees charged with the revision of the standards to which they refer.

A complete list of British Standards, numbering over 6000, fully indexed and with a note of the contents of each, will be found in the British Standards Yearbook, which may be purchased from BSI Sales Department. It may also be consulted in many public libraries and similar institutions.

This standard makes reference to the following British Standards:

- BS 443. Galvanized coatings on wire.
- BS 1441. Galvanized steel wire for armouring submarine cables.
- BS 4391. Metric basic sizes for metal wire, sheet and strip.
- BS*. Mechanical testing of steel wire.

British Standards are revised, when necessary, by the issue either of amendment slips or of revised editions. It is important that users of British Standards should ascertain that they are in possession of the latest amendments or editions.

*In course of preparation
