Foreword	3	21 Dimension at end of leader line terminating at a surface	13
Committees responsible	Back cover	22 Dimensioning small features	13
Recommendations		23 Larger dimensions placed outside smaller dimensions	13
1 Scope	5	24 Indication of a feature not drawn to scale	13
2 Definitions	5	25 Overall length added as an auxiliary dimension	13
3 Principles of dimensioning	5	26 Application of auxiliary dimensions	14
4 Method of application (general conventions)	8	27 Dimensions repeated to avoid long and intersecting leaders	14
5 Arrangement of dimensions and application of values	11	28 Notes and symbols used to avoid long and intersecting leaders	14
6 Dimensioning methods	14	29 Parallel dimensioning	14
7 Methods of dimensioning common features	17	30 Superimposed running dimensions	15
8 Toleranced dimensions	28	31 Chain dimensioning	15
9 Interpretation of toleranced centre distances	31	32 Combined dimensioning	15
10 Dimensioning and tolerancing of tapered features	32	33 Dimensioning by coordinates	16
11 Interpretations of limits of size for the control of form	37	34 Dimensioning by coordinates and a table	16
12 Completeness of drawings in respect of tolerances	38	35 Dimensions of diameters placed on the most appropriate view for clarity	17
13 Machining and surface texture indication	39	36 Dimensions related to features by leader lines	17
14 Marking	43	37 Dimensioning concentric diameters on partial views	17
Appendix		38 Dimensioning circles	18
A Aspects of engineering drawing practice covered by British and international (ISO) standards	44	39 Spherical diameters	18
Index	45	40 Dimensioning radii of arcs	18
Table		41 Locating inconveniently placed centres	19
1 Symbols for the direction of lay	42	42 Indicating radii by other dimensions	19
Figures		43 Spherical radius	19
1 Application of dimensions to suit functional requirements	6	44 Dimensioning curved lines by means of radii	19
2 Effect of changing datum surfaces from those determined by functional requirements	7	45 Dimensioning of curved lines by means of coordinates	20
3 Elements of dimensioning	8	46 Dimensioning holes	20
4 Projection lines from points of intersection	9	47 Dimensioning hole positions on a circle by angular spacing	21
5 Projection lines perpendicular to required dimensions	9	48 Dimensioning hole positions by centre distances or coordinates	21
6 Projection lines oblique to feature	9	49 Dimensioning on curved surfaces	22
7 Chord	10	50 Dimensioning of equally-spaced features	22
8 Arc	10	51 Dimensioning of equally-spaced features emphasising spacing	22
9 Angles	10	52 Dimensioning of equally-spaced features on an arc	22
10 Dimensioning interrupted features	10	53 Omission of dimensions where spacings are self-evident	23
11 Dimension lines on partial view of a symmetrical part	10	54 Locating equally-spaced features by number required	23
12 Dimensioning where space is restricted	10	55 Dimensioning repeated features	23
13 Dimensioning using oblique strokes where space is restricted	11	56 Chamfers at 45°	24
14 Use of letters and symbols with dimensions	11	57 Chamfers at angles other than 45°	24
15 Orientation of linear dimensions	12	58 Dimensioning of countersinks	24
16 Orientation of angular dimensions	12	59 Dimensioning of counterbores	25
17 Position of dimensions	12	60 Dimensioning of spotfaces	25
18 Offset dimension	12	61 Dimensioning a special screw thread	25
19 Arrangement of dimensions to avoid congestion	13	62 Dimensioning to end of full thread	26
20 Use of an extension to a dimension line	13	63 Dimensioning to end of full thread and to limit of thread run-out	26
		64 Dimensioning threaded holes	26
		65 Dimensioning keyways	27
