National foreword

This Part of this British Standard, which has been prepared under the direction of the Food and Agriculture Standards Committee, is identical with ISO 5553-1980 'Meat and meat products — Detection of polyphosphates', published by the International Organization for Standardization (ISO).

Terminology and conventions. The text of the international standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is especially drawn to the following.

The comma has been used throughout as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Wherever the words 'International Standard' appear, referring to this publication, they should be read as 'British Standard'.
