CONTROL

National foreword

This British Standard has been prepared under the direction of the Textiles and Clothing Standards Committee and forms a Part revision of BS 4784 'Method for the determination of the correct invoice mass (weight) of textiles' which is withdrawn.

This Part of BS 4784 is identical with ISO 6741/3 'Textiles — Fibres and yarns — Determination of commercial mass of consignments — Part 3: Specimen cleaning procedures', published in 1987 by the International Organization for Standardization (ISO).

The international standard comprises four Parts as follows:

- ISO 6741-1 Mass determination and calculations
- ISO 6741-2 Methods for obtaining laboratory samples
- ISO 6741-3 Specimen cleaning procedures
- ISO 6741-4 Values used for commercial allowances and the commercial moisture regains

Terminology and conventions. The text of the international standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following.

The comma has been used as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Wherever the words 'International Standard' and 'part of ISO 6741' appear, referring to this standard, they should be read as 'British Standard' and 'Part of BS 4784', respectively.

Cross-references

International standard	Corresponding British Standard
ISO 139 : 1973	BS 1051 : 1981 Glossary of terms relating to the conditioning, testing and mass determination of textiles (section one) (Technically equivalent*)
ISO 4793 : 1980	BS 1752 : 1983 Specification for laboratory sintered or fritted filters including porosity grading (Identical)
ISO 6348 : 1980	BS 1051 : 1981 Glossary of terms relating to the conditioning, testing and mass determination of textiles (section two) (Technically equivalent)
ISO 6741-1 : 1987	BS 4784 Methods for determination of commercial mass of consignments of textiles Part 1 : 1988 Mass determination and calculations (Identical)
ISO 6741-2 : 1987	Part 2 : 1988 Methods for obtaining laboratory samples (Identical)

ISO 6741-4 : 1987 to which reference is made in the text is reproduced as national appendix A of BS 4784 : Part 1 : 1988.

ISO 675 and ISO 1833, to which references are made in 5.1.1 and 5.3, are supplied for information only and hence the lack of corresponding British Standards does not affect the validity of this standard. A related British Standard to ISO 1833 is BS 4407.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

*This British Standard glossary contains all the relevant information which, in the international standard is written in terms of requirements.
