

BS 6105 : 1981
ISO 3506-1979

UDC 621.882—034.14:669.14.018.8

Specification for

Corrosion-resistant stainless steel fasteners

Spécification des éléments de fixation en acier inoxydable résistant à la corrosion

Spezifikation für korrosionsbeständige Edelstahl-Befestigungsteile

British Standards Institution

BS 6105:1981

Contents

	Page		Page
National foreword	Inside front cover	5. Breaking torque (T_m) for screws of M5 and smaller	8
Cooperating organizations	Back cover		
Specification		Figures	
0. Introduction	2	1. Marking of bolts and screws—Examples	5
1. Scope and field of application	2	2. Marking of nuts—Examples of alternative marking practice	5
2. References	2	3. Bolt extensometer with self-aligning grips	10
3. Designation, marking, finish and magnetic properties	3	4. Load-extension curve for stress at 0,2 % permanent strain ($R_{p0,2}$)	10
4. Chemical composition	6	5. Determination of total extension at fracture (A_L)	11
5. Mechanical properties	6	6. Apparatus for determination of breaking torque (T_m)	11
6. Methods of test	7		
Tables		Annexes	
1. ISO designation system for stainless steel fasteners	4	A. Stainless steel composition specifications (Extract from ISO 683/XIII)	12
2. Stainless steel fasteners—Grade composition ranges	6	B. Stainless steels for cold heading and extruding (Extract from ISO 4954)	13
3. Mechanical properties of martensitic and ferritic grade fasteners	7	C. Screw thread—Tensile stress areas	14
4. Mechanical properties of austenitic grade fasteners	8	D. Total extension at fracture (A_L)	15
