

Method for the determination of the rate of fatigue crack growth in metallic materials —

Part 1: Fatigue crack growth rates of above 10^{-8} m per cycle

ICS 77.040.10

Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee ISE/NFE/4, Mechanical testing of metals, upon which the following bodies were represented:

- British Iron and Steel Producers' Association
- British Non-Ferrous Metals Federation
- British Railways Board
- Copper Development Association
- ERA Technology Ltd.
- Electricity Association
- GAMBICA (BEAMA Ltd.)
- Institute of Materials
- Ministry of Defence
- National Physical Laboratory
- Society of British Aerospace Companies Limited
- United Kingdom Accreditation Service
- University College London
- Welding Institute

The following bodies were also represented in the drafting of the standard, through subcommittees and panels:

- AEA Technology

This British Standard, having been prepared under the direction of the Engineering Sector Board, was published under the authority of the Standards Board and comes into effect on 15 November 1998
