National foreword

This Section of BS 684 has been prepared under the direction of the Food and Agriculture Standards Committee. It is identical with ISO 6464:1983 “*Animal and vegetable fats and oils — Determination of gallates content — Molecular absorption spectrometric method*” published by the International Organization for Standardization (ISO).

Terminology and conventions. The text of the International Standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following.

The comma has been used as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Wherever the words “International Standard” appear, referring to this standard, they should be read as “British Standard”.
