This Part of BS 7141 has been prepared under the direction of the Textiles and Clothing Standards Policy Committee and supersedes BS 1801 : 1956 and BS 4004 : 1966 which are withdrawn. This Part includes only those products from BS 1801 and BS 4004 that are known to be still in use, although the fibre types permissible are less restrictive. Cross-references are given in appendix A and information specifically requested by the Ministry of Defence (MoD) and which was previously contained in defence standards is given in appendix B.

This Part of BS 7141 is based more on performance criteria than BS 1801 and BS 4004 although some elements of construction are included.

Other Parts of this British Standard are:

- Part 1 *Specification for polyamide and polyolefin woven tapes and webbings
- Part 2 *Specification for cotton webbings for personal load carrying purposes
- Part 3 *Specification for wool tapes
- Part 4 *Specification for woven elastic webbings containing natural rubber
- Part 5 *Specification for elastic flat braids containing natural rubber

Product certification. Users of this British Standard are advised to consider the desirability of third party certification of product conformity with this British Standard based on testing and continuing surveillance, which may be coupled with assessment of a supplier's quality systems against the appropriate Part of BS 5750.

Enquiries as to the availability of third party certification schemes will be forwarded by BSI to the Association of Certification Bodies. If a third party certification scheme does not already exist, users should consider approaching an appropriate body from the list of Association members.

Compliance with a British Standard does not of itself confer immunity from legal obligations. In particular, attention is drawn to The Textile Products (Indications of Fibre Content) Regulations S.I. 1986 No. 26.

*In preparation.
