

BSI Standards Publication

Biological safety cabinets

Part 1: Classes and basic requirement

National foreword

This British Standard is the UK implementation of EN 12469-1:2025. Together with BS EN 12469-2:2025 and BS EN 12469-5:2025, it partially supersedes BS EN 12469:2000.

The UK participation in its preparation was entrusted to Technical Committee LBI/1/1, Laboratory furniture and fittings.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Users of this standard in the United Kingdom are reminded that, under the Control of Substances Hazardous to Health Regulations 2002 (COSHH), biological safety cabinets, being classed as local exhaust ventilation (LEV) equipment, must undergo a Thorough Examination and Test (TE_{XT}) examination, conducted at least once every 14 months and suitable records kept. This is in addition to regular maintenance and checks as described in this and other parts of the EN 12469 series.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.
