Textile floor coverings — Assessment of impregnations in needed floor coverings by means of a soiling test

National foreword

This British Standard is the UK implementation of EN 1269:2015. It supersedes BS EN 1269:1997+A1:2007 which is withdrawn.

BSI, as a member of CEN, is obliged to publish EN 1269 as a British Standard. However, attention is drawn to the fact that during the development of this European Standard, the UK committee voted against its approval as a European Standard.

When EN 1269 was at the prEN formal vote stage the UK committee voted against it because they considered that a precision clause was needed, i.e. a clause providing any available interlaboratory trial results obtained comparing methods A and B.

The UK participation in its preparation was entrusted to Technical Committee PRI/3, Textile floor coverings.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
