

Water quality — Determination of mercury — Method using atomic absorption spectrometry

The European Standard EN 1483:2007 has the status of a
British Standard

ICS 13.060.30

National foreword

This British Standard was published by BSI. It is the UK implementation of EN 1483:2007. It supersedes BS EN 1483:1997 which is withdrawn.

The UK participation in its preparation was entrusted by Technical Committee EH/3, Water quality, to Subcommittee EH/3/2, Physical, chemical and biochemical methods.

A list of organizations represented on this committee can be obtained on request to its secretary.

Note that UK committee EH/3/2, Physical, chemical and biochemical methods, submitted a vote of disapproval on the draft EN on the grounds that this method is considered outdated and less sensitive than other available methods. It is the opinion of UK committee EH/3/2 that more appropriate methods are available such as those found in BS EN 13506:2002 and BS ISO 17852:2006.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 31 May 2007
