

Cylindrical helical springs made of round wire — Quality specifications for cold coiled compression springs

ICS 21.160

National foreword

This British Standard is the UK implementation of EN 15800:2008. It partially supersedes BS 1726-1:2002, which is being revised to remove conflicting material. In the meantime, where conflict exists between the two standards the provisions of BS EN 15800:2008 take precedence.

The UK participation in its preparation was entrusted by Technical Committee FME/9, Fasteners, to subcommittee FME/9/3, Product standards for fasteners.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 31 January 2009
