...making excellence a habit.™

National foreword

This British Standard is the UK implementation of EN 61300-2-28:2013. It is identical to IEC 61300-2-28:2013, incorporating corrigendum December 2013. It supersedes BS EN 61300-2-28:1997 which is withdrawn.

Attention is drawn to the fact that during the development of this international standard, the UK committee voted against its approval as a British standard.

The UK committee draws users' attention towards the conflicting statements in the scope and clause 3 about the intent of the document, in regards to whether the test is a general corrosion test. The scope states that the test 'can be considered a general corrosion test', whereas clause 3 states that the test 'is not suitable as a general corrosion test'. It is the opinion of the UK committee that it can be used as a general corrosion test.

The UK participation in its preparation was entrusted by Technical Committee GEL/86, Fibre optics, to Subcommittee GEL/86/2, Fibre optic interconnecting devices and passive components.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
