

BSI Standards Publication

Organization and digitization of information about buildings and civil engineering works, including building information modelling (BIM) — Information management using building information modelling

Part 6: Health and safety information

National foreword

This British Standard is the UK implementation of EN ISO 19650-6:2025. It is identical to ISO 19650-6:2025. It supersedes PAS 1192-6:2018, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee B/555, Construction design, modelling and data exchange.

A list of organizations represented on this committee can be obtained on request to its committee manager.

This standard does not define or change the duties set out in any relevant statutory provisions.

Appropriate use can support the generation, sharing, presentation, use and generalization of information where required by the Health and Safety at Work etc Act 1974 and legislation enacted under it. This includes the Construction (Design and Management) Regulations 2015 and the Management of Health and Safety at Work Regulations 1999.

PAS 1192-6:2018 provided the foundational material for this standard. Although now withdrawn, it is the opinion of the UK committee that it contains material that may still assist users of this standard on how health and safety information is produced, flows and can be used throughout the project and asset life cycle.

Guidance and information supporting the use of this and other standards in the BS EN ISO 19650 series is available at the UK BIM Framework (www.ukbimframework.org) and nima (wearenima.im).
