

Water quality — Determination of free chlorine and total chlorine —

Part 1: Titrimetric method using *N,N*-diethyl-1,4-phenylenediamine

The European Standard EN ISO 7393-1:2000 has the status
of a British Standard.

ICS 13.060.50

Confirmed
July 2008

National foreword

This British Standard is the English language version of EN ISO 7393-1:2000. It is identical to ISO 7393-1:1985.

The UK participation in its preparation was entrusted by Technical Committee EH/3, Water quality, to Subcommittee EH/3/2, Physical, Chemical and Biochemical, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international committee any enquiries on interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

BS EN ISO 7393-1 is one of a series of standards on water quality, others of which have been, or will be, published as sections of BS 6068. This standard has therefore been given the secondary identifier BS 6068-2.25. The various sections of BS 6068 are comprised within parts 1 to 7, which, together with part 0, are listed below.

- *Part 0: Introduction;*
- *Part 1: Glossary;*
- *Part 2: Physical, chemical and biochemical methods;*
- *Part 3: Radiological methods;*
- *Part 4: Microbiological methods;*
- *Part 5: Biological methods;*
- *Part 6: Sampling;*
- *Part 7: Precision and accuracy.*

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index” or by using the “Find” facility of the BSI Standards Electronic Catalogue.

The method referred to in 4.2, for the disposal of solutions containing mercury given in ISO 5790 is technically equivalent to that given in the national appendix BS 6070-2, *Methods of sampling and test for sodium carbonate for industrial use — Part 2: Determination of chloride content*.

Textual error. When adopting the text of the international standard, the following textural error was discovered. It has been marked in the text and has been reported to ISO in a proposal to amend the text of the international standard.

In 4.5.2, the equation should be read as:

$$c_1 = V_2 \frac{c_2}{2V_1}$$

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN ISO title page, the EN ISO foreword page, pages 1 to 8, an inside back cover and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.

This British Standard, having been prepared under the direction of the Environment and Pollution Standards Committee, was published under the authority of the Board of BSI and comes into effect on 28 November 1986
