Determining the peak spatial-average specific absorption rate (SAR) in the human body from wireless communications devices, 30 MHz to 6 GHz

Part 1: General requirements for using the finite-difference time-domain (FDTD) method for SAR calculations

National foreword

This British Standard is the UK implementation of IEC/IEEE 62704-1 Ed.1.0.

The UK participation in its preparation was entrusted to Technical Committee GEL/106, Human exposure to low frequency and high frequency electromagnetic radiation.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
