

Natural gas — Designation of the quality of natural gas for use as a compressed fuel for vehicles

ICS 75.060

National foreword

This British Standard reproduces verbatim ISO 15403:2000 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee PTI/15, Natural gas and gas analysis, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

NOTE In regard to the information given in informative annex E, it should be noted that the data may be superseded by more recent work done by GERG. Until the new correlation data is made available and has gained international acceptance, the data given in annex E should be used for guidance only; it is recommended that measurements of water content, usually at atmospheric pressure, should be taken to avoid confusion between parties, and providing traceability directly to the absolute water content.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages
