

Determination of the hot storage stability of modified bitumen binders

(Identical with IP PM CH/1999)

ICS 75.140; 91.100.50

National foreword

This Draft for Development is not to be regarded as a British Standard.

It is being issued in the Draft for Development series of publications and is of a provisional nature. It should be applied on this provisional basis, so that information and experience of its practical application may be obtained.

Comments arising from the use of this Draft for Development are requested so that experience in its application can be compiled.

According to the replies received by the end of the review period, the responsible BSI Committee will decide whether to support its conversion into a British Standard, to extend the life of the prestandard or to withdraw it. Comments should be sent in writing to the Secretary of BSI Technical Committee PTI/13, Petroleum testing and terminology, at The Institute of Petroleum, 61 New Cavendish Street, London W1M 8AR, giving the document reference and clause number and proposing, where possible, an appropriate revision of the text.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.
