Numerical control of machines — Interchangeable punched tape variable block format for positioning and straight-cut machining

First edition — 1973-12-01

UDC 681.327.44 : 681.323 : 621.9-52

Ref. No. ISO 1057-1973 (E)

Descriptors : data processing, numerical control, punched tapes, interchangeability, data layout, coding.

Price based on 10 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, International Standard ISO 1057 replaces ISO Recommendation R 1057-1969 drawn up by Technical Committee ISO/TC 97, *Computers and information processing*.

The Member Bodies of the following countries approved the Recommendation :

Australia	Iran	Spain
Belgium	Israel	Sweden
Czechoslovakia	Japan	Switzerland
Denmark	Netherlands	Turkey
Egypt, Arab Rep. of	New Zealand	United Kingdom
France	Poland	U.S.A.
Germany	Portugal	

The Member Body of the following country expressed disapproval of the Recommendation on technical grounds :

Italy
