Solid fuelled heaters — Test method for determining allowable clearances from combustible surfaces

*Radiateurs à combustibles solides — Méthode d'essai pour la
détermination des écartements permis des surfaces des combustibles*

Reference number
ISO 10774:1992(E)

Contents

	Page
1 Scope	1
2 Normative references	1
3 Definitions	1
4 Appliance specification	2
5 Principle	2
6 Apparatus and calibrations	2
7 Test room	3
8 Test enclosure and appliance installation	4
9 Placement of thermocouples	7
10 Attachment of thermocouples	10
11 Test fuels and loads	11
12 Pretest procedure	13
13 Test procedure	14
14 Post-firing procedures	18
15 Maximum allowable temperatures	18
16 Test reports	18
17 Applicability of test results	19
18 Variation from tested appliance	20
19 Determination of allowable material service temperatures	20
20 Recognition of testing laboratory	20
21 Ice point and boiling point thermocouple checks	20
 Annex	
A Calibration of test enclosure	22
