Cast copper alloys — Composition and mechanical properties

Cupro-alliages moulés — Composition et caractéristiques mécaniques

First edition — 1977-09-01

UDC 669.35-14

Ref. No. ISO 1338-1977 (E)

Descriptors : non-ferrous products, copper alloys, brasses, bronzes, aluminium bronzes, castings, ingots, materials specifications, chemical composition, mechanical properties.

Price based on 11 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 1338 was developed by Technical Committee ISO/TC 26, *Copper and copper alloys*, and was circulated to the member bodies in December 1975.

It has been approved by the member bodies of the following countries :

Australia	Germany	Spain
Austria	Hungary	Sweden
Belgium	India	Switzerland
Canada	Ireland	Turkey
Chile	Japan	United Kingdom
Denmark	Poland	U.S.S.R.
Finland	Romania	Yugoslavia
France	South Africa, Rep. of	

The member body of the following country expressed disapproval of the document on technical grounds :

U.S.A.
