Moulded polyvinyl chloride (PVC) pipe-fittings — Determination of Vicat softening temperature

*Raccords moulés en polychlorure de vinyle (PVC) — Détermination de la température
de ramollissement Vicat*

First edition — 1976-02-01

UDC 621.643.4 : 678.743 : 620.172

Ref. No. ISO 2056-1976 (E)

Descriptors : piping, plastic tubes, polyvinyl chloride, pipe fittings, tests, measurement, softening point.

Price based on 3 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2056 was drawn up by Technical Committee ISO/TC 138, *Plastics pipes, fittings and valves for the transport of fluids*, and circulated to the Member Bodies in June 1974.

It has been approved by the Member Bodies of the following countries :

Austria	Israel	Sweden
Belgium	Italy	Switzerland
Bulgaria	Japan	Thailand
Czechoslovakia	Mexico	Turkey
Denmark	New Zealand	United Kingdom
Egypt, Arab Rep. of	Norway	U.S.A.
Finland	Poland	U.S.S.R.
France	Portugal	Yugoslavia
Germany	Romania	
Ireland	Spain	

The Member Body of the following country expressed disapproval of the document on technical grounds :

Netherlands
