

INTERNATIONAL STANDARD

**ISO
2110**

Third edition
1989-10-01

Information technology — Data communication — 25-pole DTE/DCE interface connector and contact number assignments

*Technologies de l'information — Communication de données — Connecteur
d'interface ETTD/ETCD à 25 pôles et affectation des numéros de contact*

Reference number
ISO 2110 : 1989 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 2110 was prepared by Technical Committee ISO/TC 97, *Information processing systems*.

This third edition cancels and replaces the second edition (ISO 2110 : 1980), of which it constitutes a minor revision: certain terms have been aligned with the terms and definitions used by IEC.

Annex A of this International Standard is for information only.
