

INTERNATIONAL STANDARD

ISO 2110

Third edition
1989-10-01

AMENDMENT 1
1991-09-15

Information technology — Data communication — 25-pole DTE/DCE interface connector and contact number assignments

**AMENDMENT 1: Interface connector and contact
assignments for a DTE/DCE interface for data
signalling rates above 20 000 bit/s**

*Technologies de l'information — Communication de données — Connecteur
d'interface ETTD/ETCD à 25 pôles et affectation des numéros de contacts*

*AMENDEMENT 1: Connecteur d'interface et affectation des numéros de contacts à
l'interface ETTD/ETCD pour un débit binaire supérieur à 20 kbit/s*

Reference number
ISO 2110 : 1989/Amd.1 : 1991 (E)

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Amendment 1 to International Standard ISO 2110 : 1989 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*.

Annex B of this Amendment is for information only.
