ISO
2235

Third edition
1993-07-15

Abrasive sheets — Dimensions, tolerances and designation

Feuilles abrasives — Dimensions, tolérances et désignation

Reference number
ISO 2235:1993(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 2235 was prepared by Technical Committee ISO/TC 29, *Small tools*, Sub-Committee SC 5, *Grinding wheels and abrasives*.

This third edition cancels and replaces the second edition (ISO 2235:1981), of which subclause 4.1.2 (corresponding to subclause 2.1.2 of the present edition) has been technically revised.

Annex A of this International Standard is for information only.
