Photography — Light sources for use in sensitometric exposure — Simulation of the spectral distribution of photoflood illumination

First edition — 1972-10-15

UDC 771.449.7

Ref. No. ISO 2242-1972 (E)

Descriptors : photography, light sources, sensitometers, spectral energy distribution, simulation, photographic flood lights

Price based on 3 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 2242 was drawn up by Technical Committee ISO/TC 42, *Photography*.

It was approved in September 1971 by the Member Bodies of the following countries :

Belgium	Japan	Thailand
Czechoslovakia	New Zealand	United Kingdom
Egypt, Arab Rep. of	Romania	U.S.A.
France	South Africa, Rep. of	U.S.S.R.
Germany	Spain	
Italy	Switzerland	

No Member Body expressed disapproval of the document.
