Descriptors : cans, metal packages, preserved food, dimensions, capacity, dimensional tolerances.

Price based on 2 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3004/I was developed by Technical Committee ISO/TC 52, *Metal containers*, and was circulated to the member bodies in January 1978.

It has been approved by the member bodies of the following countries :

Australia	India	Sweden
Austria	Israel	Switzerland
Belgium	Italy	Turkey
Czechoslovakia	Mexico	United Kingdom
Denmark	Netherlands	U.S.A.
Finland	New Zealand	Yugoslavia
France	Romania	
Germany, F. R.	South Africa, Rep. of	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Canada
Poland

ISO 3004/I cancels and replaces ISO 3004-1974.
