**Rolling bearings — Radial needle roller bearings —
Metric series — Dimension series 48 and 49 — Tolerances —
Normal tolerance class**

*Roulements — Roulements à aiguilles — Séries métriques — Séries de dimensions 48 et 49 — Tolérances —
Classe de tolérances normales*

First edition — 1974-08-01

UDC 621.822.8

Ref. No. ISO 3097-1974 (E)

Descriptors : rolling bearings, roller bearings, needle bearings, dimensional tolerances.

Price based on 2 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3097 was drawn up by Technical Committee ISO/TC 4, *Rolling bearings*, and circulated to the Member Bodies in February 1973.

It has been approved by the Member Bodies of the following countries :

Australia	Hungary	Spain
Austria	India	Sweden
Belgium	Italy	Switzerland
Brazil	Japan	Thailand
Bulgaria	Mexico	Turkey
Canada	Netherlands	United Kingdom
France	Poland	U.S.S.R.
Germany	Romania	

This International Standard has also been approved by the International Union of Railways (UIC).

The Member Body of the following country expressed disapproval of the document on technical grounds :

U.S.A.
