Joins in building — General check-list of joint functions

Joins dans le bâtiment — Liste générale aide-mémoire des fonctions des joints

First edition — 1975-11-01

UDC 72.011

Ref. No. ISO 3447-1975 (E)

Descriptors : buildings, construction, joints, specification, design, selection.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3447 was drawn up by Technical Committee ISO/TC 59, *Building construction*, and circulated to the Member Bodies in June 1974.

It has been approved by the Member Bodies of the following countries :

Austria	Germany	Norway
Belgium	Hungary	Romania
Brazil	Iran	South Africa, Rep. of
Canada	Ireland	Thailand
Denmark	Israel	United Kingdom
Egypt, Arab Rep. of	Italy	Yugoslavia
Finland	Netherlands	
France	New Zealand	

The Member Body of the following country expressed disapproval of the document on technical grounds :

Switzerland

This International Standard forms one of a series concerning joints in building. The series includes the following International Standards :

ISO 2444, *Joints in building — Vocabulary.*

ISO 2445, *Joints in building — Fundamental principles for design.*
