Ref. No. ISO 375-1974 (E)

Descriptors : steels, steel products, tubes, steel tubes, tests, mechanical tests, tension tests, elongation, elongation after fracture, permanent elongation, elastic limit.

Price based on 13 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 375 was drawn up by Technical Committee ISO/TC 17, *Steel*, and circulated to the Member Bodies in March 1972.

It has been approved by the Member Bodies of the following countries :

Australia	France	Romania
Austria	Germany	South Africa, Rep. of
Belgium	Hungary	Spain
Canada	India	Sweden
Chile	Ireland	Switzerland
Czechoslovakia	Italy	Thailand
Denmark	Netherlands	Turkey
Egypt, Arab Rep. of	New Zealand	United Kingdom
Finland	Poland	U.S.A.

The Member Bodies of the following countries expressed disapproval of the document on technical grounds :

Japan
Norway

This International Standard cancels and replaces ISO Recommendation R 375-1964.
