Concrete — Determination of flexural strength of test specimens

Béton — Détermination de la résistance à la flexion des éprouvettes

First edition — 1978-08-15

UDC 691.32 : 620.174

Ref. No. ISO 4013-1978 (E)

Descriptors : concrete, test specimens, tests, bend tests, determination.

Price based on 4 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4013 was developed by Technical Committee ISO/TC 71, *Concrete, reinforced concrete and pre-stressed concrete*, and was circulated to the member bodies in January 1976.

It has been approved by the member bodies of the following countries :

Australia	India	Romania
Austria	Israel	South Africa, Rep. of
Belgium	Italy	Spain
Bulgaria	Korea, Dem.P.Rep. of	Turkey
Canada	Mexico	United Kingdom
Czechoslovakia	New Zealand	U.S.A.
Denmark	Norway	U.S.S.R.
Egypt, Arab Rep. of	Poland	Yugoslavia
Germany	Portugal	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

France
Netherlands
