Ref. No. ISO 4530-1983 (E)

Descriptors : non metallic coatings, porcelain enamels, vitreous enamels, tests, thermal resistance.

Price based on 2 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4530 was developed by Technical Committee ISO/TC 107, *Metallic and other non-organic coatings*, and was circulated to the member bodies in January 1982.

It has been approved by the member bodies of the following countries :

Australia	Ireland	South Africa, Rep. of
Czechoslovakia	Italy	Spain
Egypt, Arab Rep. of	Japan	Switzerland
France	Korea, Rep. of	United Kingdom
Germany, F.R.	Mexico	USA
Hungary	Netherlands	USSR
India	Romania	

The member body of the following country expressed disapproval of the document on technical grounds :

Poland
