

INTERNATIONAL STANDARD

ISO
4591

Second edition
1992-12-01

Plastics — Film and sheeting — Determination of average thickness of a sample, and average thickness and yield of a roll, by gravimetric techniques (gravimetric thickness)

*Plastiques — Film et feuille — Détermination de l'épaisseur moyenne
d'un échantillon, et de l'épaisseur moyenne d'un rouleau, ainsi que de sa
surface par unité de masse, par mesures gravimétriques (épaisseur
gravimétrique)*

Reference number
ISO 4591:1992(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 4591 was prepared by Technical Committee ISO/TC 61, *Plastics*, Sub-Committee SC 11, *Products*.

This second edition cancels and replaces the first edition (ISO 4591:1979), which has been technically revised.
