Essential oils — Quantitative evaluation of residue on evaporation

Huiles essentielles — Évaluation quantitative du résidu d'évaporation

First edition — 1978-10-01

OCT 16 1978

UDC 668.5 : 543.814

Ref. No. ISO 4715-1978 (E)

Descriptors : essential oils, residues, chemical analysis, evaporation analysis.

Price based on 2 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4715 was developed by Technical Committee ISO/TC 54, *Essential oils*, and was circulated to the member bodies in August 1977.

It has been approved by the member bodies of the following countries :

Australia	India	South Africa, Rep. of
Austria	Italy	Spain
Brazil	Japan	Sri Lanka
Canada	Korea, Rep. of	Thailand
Chile	Netherlands	Turkey
France	Portugal	U.S.S.R.

No member body expressed disapproval of the document.
