UDC 669.71/.72 : 620.1

Ref. No. ISO 5191-1980 (E)

Descriptors : aluminium products, orders (commitments), specifications, inspection, tests, delivery.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5191 was developed by Technical Committee ISO/TC 79, *Light metals and their alloys*, and was circulated to the member bodies in August 1978.

It has been approved by the member bodies of the following countries :

Australia	Hungary	South Africa, Rep. of
Austria	India	Spain
Brazil	Ireland	Sweden
Bulgaria	Italy	Switzerland
Canada	Japan	United Kingdom
Chile	Mexico	USA
Czechoslovakia	Netherlands	USSR
Egypt, Arab Rep. of	Norway	Yugoslavia
France	Romania	

No member body expressed disapproval of the document.
