Descriptors : paper pulps, test specimen conditioning, refining, laboratory equipment.

Price based on 6 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5264/1 was developed by Technical Committee ISO/TC 6, *Paper, board and pulps*, and was circulated to the member bodies in December 1977.

It has been approved by the member bodies of the following countries :

Belgium	Iran	South Africa, Rep. of
Canada	Ireland	Spain
Chile	Italy	Sweden
Czechoslovakia	Kenya	Switzerland
Finland	Mexico	Turkey
France	Netherlands	United Kingdom
Germany, F. R.	Norway	USA
Hungary	Poland	USSR
India	Romania	

No member body expressed disapproval of the document.
