Sodium hexafluorosilicate for industrial use — Determination of loss in mass at 105 °C

Hexafluorosilicate de sodium à usage industriel — Détermination de la perte de masse à 105 °C

First edition — 1978-11-15

NOV 16 1978

UDC 661.488 : 543.71

Ref. No. ISO 5444-1978 (E)

Descriptors : chemical compounds, sodium fluorosilicates, physical tests, determination, mass loss by heating, gravimetric analysis.

Price based on 2 pages

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5444 was developed by Technical Committee ISO/TC 47, *Chemistry*, and was circulated to the member bodies in July 1976.

It has been approved by the member bodies of the following countries :

Belgium	Israel	South Africa, Rep. of
Brazil	Italy	Spain
Chile	Korea, Rep. of	Switzerland
Czechoslovakia	Mexico	Thailand
France	Netherlands	Turkey
Germany, F.R.	Philippines	United Kingdom
Hungary	Poland	U.S.S.R.
India	Romania	Yugoslavia

No member body expressed disapproval of the document.

This International Standard has also been approved by the International Union of Pure and Applied Chemistry (IUPAC).
