Petroleum products — Hydrocarbon liquids — Determination of refractive index

Produits pétroliers — Hydrocarbures liquides — Détermination de l'indice de réfraction

First edition — 1983-10-15

UDC 665.7 : 535.324

Ref. No. ISO 5661-1983 (E)

Descriptors : petroleum products, hydrocarbons, liquid fuels, tests, determination, refractive index, optical tests, reference materials.

Price based on 2 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5661 was developed by Technical Committee ISO/TC 28, *Petroleum products and lubricants*, and was circulated to the member bodies in December 1981.

It has been approved by the member bodies of the following countries:

Austria	India	South Africa, Rep. of
Belgium	Iraq	Spain
Brazil	Israel	Sri Lanka
Canada	Japan	Sweden
Czechoslovakia	Korea, Rep of	Switzerland
Egypt, Arab Rep. of	Netherlands	Turkey
France	Peru	United Kingdom
Germany, F.R.	Poland	USA
Hungary	Romania	USSR

The member bodies of the following countries expressed disapproval of the document on technical grounds:

Australia
Ireland
