UDC 685.363.2

Ref. No. ISO 5901-1980 (E)

Descriptors : sports equipment, alpine skis, geometrical characteristics, definitions, measurement, dimensional tolerances.

Price based on 3 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5901 was developed by Technical Committee ISO/TC 83, *Sports and recreational equipment*, and was circulated to the member bodies in January 1978.

It has been approved by the member bodies of the following countries :

Austria	Italy	South Africa, Rep. of
Egypt, Arab Rep. of	Mexico	Turkey
France	New Zealand	USA
Germany, F. R.	Poland	USSR
India	Romania	Yugoslavia

No member body expressed disapproval of the document.
