ISO
6

Second edition
1993-02-01

Photography — Black-and-white pictorial still camera negative film/process systems — Determination of ISO speed

*Photographie — Systèmes film/traitement négatifs noir et blanc pour
photographie picturale — Détermination de la sensibilité ISO*

Reference number
ISO 6:1993(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 6 was prepared by Technical Committee ISO/TC 42, *Photography*.

This second edition cancels and replaces the first edition (ISO 6:1974). The primary change is to eliminate the restriction that the ISO speed of all black-and-white films be determined in a specified developer and fixing bath. It also updates references, procedures and the format in accordance with more recent speed standards for other film types.

Annexes A and B of this International Standard are for information only.
