

INTERNATIONAL STANDARD

ISO
6012

Fourth edition
1997-03-01

Earth-moving machinery — Service instrumentation

Engin de terrassement — Instruments pour l'entretien

Reference number
ISO 6012 1997(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 6012 was prepared by Technical Committee ISO/TC 127, *Earth-moving machinery*.

This fourth edition cancels and replaces the third edition (ISO 6012:1989), which has been technically revised.
