Micrographics — Unitized microfilm carrier (aperture card) — Determination of adhesion of protection sheet to aperture adhesive

Micrographie — Cartes à fenêtre — Détermination de l'adhérence du papier de protection à l'adhésif de la fenêtre

First edition — 1981-10-15

UDC 778.14 : 002 : 620.16

Ref. No. ISO 6343-1981 (E)

Descriptors : reproduction (copying), microscopy, aperture cards, determination, adhesion, dimensions, adhesion tests.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6343 was developed by Technical Committee ISO/TC 171, *Micrographics*, and was circulated to the member bodies in July 1980.

It has been approved by the member bodies of the following countries :

Australia	Egypt, Arab Rep. of	Netherlands
Belgium	France	Romania
Brazil	Germany, F. R.	Spain
Canada	Ireland	United Kingdom
Czechoslovakia	Italy	USA
Denmark	Japan	USSR

The member body of the following country expressed disapproval of the document on technical grounds :

Poland
