Animal feeding stuffs — Determination of calcium content — Part 1 : Titrimetric method

Aliments des animaux — Détermination de la teneur en calcium — Partie 1 : Méthode titrimétrique

First edition — 1985-11-01

UDC 636.085/.087 : 543.24 : 546.41

Ref. No. ISO 6490/1-1985 (E)

Descriptors : animal feeding products, chemical analysis, determination of content, calcium, volumetric analysis.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 6490/1 was prepared by Technical Committee ISO/TC 34, *Agricultural food products*.

Users should note that all International Standards undergo revision from time to time and that any reference made herein to any other International Standard implies its latest edition, unless otherwise stated.
