Steel and cast iron — Determination of sulphur content — Combustion titrimetric method

Aciers et fontes — Dosage du soufre — Méthode titrimétrique après combustion

First edition — 1982-11-15

UDC 669.13/.14 : 543.24 : 546.22

Ref. No. ISO 671-1982 (E)

Descriptors : steels, cast iron, chemical analysis, determination of content, sulphur, combustion analysis, volumetric analysis.

Price based on 5 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 671 was developed by Technical Committee ISO/TC 17, *Steel*.

It was submitted directly to the ISO Council, in accordance with clause 5.10.1 of part 1 of the Directives for the technical work of ISO. It cancels and replaces ISO Recommendation R 671-1968, which had been approved by the member bodies of the following countries :

Australia	Hungary	Romania
Austria	India	South Africa, Rep. of
Belgium	Israel	Spain
Brazil	Italy	Sweden
Canada	Japan	Switzerland
Chile	Korea, Rep. of	Turkey
Czechoslovakia	Netherlands	United Kingdom
Denmark	New Zealand	Yugoslavia
Egypt, Arab Rep. of	Norway	
Germany, F. R.	Poland	

The member bodies of the following countries had expressed disapproval of the document on technical grounds :

France
Portugal
USA
