

INTERNATIONAL STANDARD

ISO
6805

Second edition
1994-10-01

Rubber hoses and hose assemblies for underground mining — Wire-reinforced hydraulic types for coal mining — Specification

*Tuyaux et flexibles en caoutchouc pour les mines souterraines — Types
hydrauliques avec armure de fils métalliques pour mines de charbon —
Spécifications*

Reference number
ISO 6805:1994(E)

ISO 6805:1994(E)**Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 6805 was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 1, *Hoses (rubber and plastics)*.

This second edition cancels and replaces the first edition (ISO 6805:1984), which has been technically revised.
